

Proficient Outdoor Sound

More Bass for Your Chaise

Proficient Outdoor Speakers Deliver Backyard Bass All Over Your Place

No matter how comfortable the chaise lounge or how cool the drink, real relaxation comes only when the sound outdoors is as good as the sound indoors. That's why Proficient's all-weather speakers use a ported design — delivering deeper, more powerful bass.

The combination of the ported design with a big 8-inch woofer in our AW830 three-way brings outdoor sound to a new level. Even our compact AW525 pumps out enough bottom end to get any backyard grooving.

Proficient's all-weather line also includes twin-tweeter models for stereo sound from a single speaker, as well as stereo and twin-tweeter Rocks for stealthy sound. Our outdoor speakers sound great through years of rough weather because they're built tough.

They're everything you need to keep you happy tune after tune, summer after summer. All from Proficient — your premium brand for incredible outdoor sound systems.

Indoor / Outdoor Speakers

AW830

8" Stereo Indoor/Outdoor Speakers

Woofers: 8" Polypropylene Cones

Midrange: 3" Graphite Cones

Tweeters: 1" Pivoting Supernil Soft Domes
